Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6, 9-15, 18-24 and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Osada et al. (6,885,057).

Fig. 3 discloses a reducing mechanism MP101 as recited in claim 10 (also see column 9 lines 1-40) as recited in claims 10 and 18.

The low voltage is below a threshold of the transistors, therefore, the circuit would not perform computations as recited in claims 11 and 12.

Further shown is a restoring mechanism MP100 as recited in claim 13.

Fig. 4 shows gradual ramping as recited in claims 14 and 15.

Claims 19-24 and 27 are anticipated for the reasons above.

The disclosed circuit performs the methods recited in claims 1-6 and 9.

Conclusion

3. Claims 7, 8, 16, 17, 25 and 26 are objected to as being dependent upon a rejected base claim, but may be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
